

If so, then you are encouraged to apply for the ASIAA Summer Student Program. Students conduct original research in observational, theoretical, or laboratory-based projects under the supervision of a professional astronomer at ASIAA. Participants also attend regular lectures on a broad range of astronomy topics. Our Summer Student Program is an excellent opportunity to prepare for further studies in astronomy and astrophysics.

**Qualified Applicants:** Undergraduate students majoring in mathematical, physical, computational sciences, and engineering. Students at all levels will be considered, but those starting their 3<sup>rd</sup>, 4<sup>th</sup> year, or a Master's course in the fall of 2024 are preferred.

**All applicants should be made online. For details, please see the ASIAA homepage.**
